

UNIVERSAL HEALTH CLINIC - PATIENT ENCOUNTER FORM

Patient Name: John Doe

DOB: 05/12/1980

Date of Service: 02/06/2026

Clinical Notes:

Chief Complaint: Patient presents with skin lesion and accidental chemical exposure.

History of Present Illness:

1. Skin: Patient has a dark, irregular mole on the left forearm.
Biopsy results confirm Malignant Melanoma of skin (upper limb).
2. Poisoning: Patient accidentally ingested a small amount of 2-propanol while working in the garage 2 hours ago.

Assessment / Diagnosis:

- Malignant melanoma of skin of left forearm
- Accidental poisoning by 2-propanol

Plan:

- Refer to Oncology.
 - Monitor vitals for chemical exposure response.
-

Pre-Billing Coding (For Audit):

1. Melanoma: Code C43.6 (Malignant melanoma of upper limb)
2. Poisoning: Code T51.2X2 (Toxic effect of 2-Propanol, Intentional Self-harm)

Auditor Note: Please verify if 'Intentional Self-harm' matches the clinical notes.
